

✓ OFFICE PARKEN WITH PARKONEER:

dynamic
smart
intuitive

Making office parking simple

In many companies, office parking and parking space allocation still happens in an analog way - with forms, plastic cards, window stickers and so on. Even Though we do everything else online.

You're asking why parking management should be any different? We are questioning this as well - and we have the solution for you!

parkoneer helps you manage existing parking spaces dynamically and digitally. We will turn you into a parking expert - and shift the management from a stack of files into the digital age. With **parkoneer**, you can assign tailor-made parking permits. Not by hand, of course, and not every day anew.

Your job is this easy with parkoneer

As a **parkoneer** admin you define certain quotas. For example, 300 parking spaces on weekdays from 7 a.m. to 6 p.m. for employees, 30 for visitors and 70 for other people who are looking for a parking space near your office. After hours you provide a larger share for residents and the entire contingent on Saturdays.

Pre-registered parkers simply book their parking space via our **parkoneer** solution. All they need to do is enter their license plate number. When entering the parking lot, the camera recognizes the license plate number and the barrier to the parking space opens.

So what do you get out of it?

Easy: As a **parkoneer** you make optimal use of your company's parking spaces, contribute to less time being spent searching for an empty spot and make people in the company happier. If desired, you can even incorporate payment service provider for an easy digital payment. This transforms your parking space from a cost into a profit center. And on top: With the **parkoneer** access control system, there are no more wild parkers on the area.

If you nod here, you should become a parkoneer

- ✓ You manage the parking areas in your company and would like to make it more efficient and easier in the future.
- ✓ Your employees approach you every couple of hours because they need access rights for a new vehicle or don't need their parking space for a certain time due to mobile work, want to book parking spaces for visitors, etc.
- ✓ Your company's parking spaces are unevenly utilized.
- ✓ Some employees are frustrated because they are not allowed to use the office parking lot, even though spaces are available.
- ✓ In the evenings and on weekends residents and visitors circle around the office building searching for a parking space, hoping to find one there.

That's why parking management is fun now

We provide you with an intuitive setup: barrier, lane assistant and camera – that's it. Easily installed via plug-and-play. Important to know: parkoneer is part of the Parking Solutions division of the family-owned company Scheidt & Bachmann, one of the world's leading manufacturer of hardware and software for parking management.

Since parkoneer runs as a Software-as-a-Service (SaaS) in the cloud, you always use the latest software version and manage all your parking permissions purely web-based: no app, no tickets, no transponders, no plastic cards and no additional IT infrastructure.

Your advantages with Office Parking by parkoneer

- ✓ Smart, efficient parking management
- ✓ Increased employee satisfaction
- ✓ Chance of additional income
- ✓ Less parking search traffic and no more wild parkers
- ✓ User-friendly dashboard, overview of all parking transactions
- ✓ Optional: detailed reports and digital payment processing
- ✓ Hardware in Scheidt & Bachmann quality

How do I become a parkoneer?

You contact us. Our local partners assemble the lean hardware package consisting of barrier, lane assistant and camera. You assign parking rights for certain users and times. The rest runs automatically from there - unless you want to change something.
